

Inclusive Campus Life

Working and studying together in higher education. A place for everyone!

Friday and Saturday 7 and 8 June 2019

An inclusive campus is an environment of colleges and universities that is welcome and accessible to everyone. Also for people with intellectual disabilities. How do you manage that? We will share the knowledge and experiences in the Netherlands and various other European countries at a two-day conference. We focus on five themes:

1. accessibility of a college and university
2. work and employment at a college or university
3. learn and study at a college or university
4. buddy systems
5. a framework and monitoring tool for management and employees to support, monitor and value ambitions towards an inclusive university or university.

What's our goal?

The exchange of knowledge, experiences and ideas concerning the inclusion of people with a mental disability at a college or university.

For whom is this conference relevant?

- Anyone interested in the topic of involving persons with an intellectual disability at the campus.
- Interest groups for and by people with intellectual disabilities
- Service providers of care and support for people with intellectual disabilities: supervisors, coaches, HRM.
- Teachers, lecturers and coordinators at institutions of higher education.
- Managers and policy officers at institutions of higher education, including support services and HRM.
