Dr Ryan Haecker, Fellow of the American Academy in Rome, is the author of the forthcoming book *Restoring Reason: Theology of Logic in Origen of Alexandria*. In this work, Dr Haecker argues that Origen's Trinitarian theology has important implications for theological interpretations of logic, which we can call a „theology of logic“.

Restoring Reason: Theology of Logic in Origen of Alexandria is the second volume in the new book series *Studies on Triadic Ontology and Trinitarian Philosophy*, published by the prestigious philosophical publisher Verlag Karl Alber (Nomos). The inaugural volume of this series, *Trinitarian Ontologies: Towards a Trinitarian Transformation of Philosophy*, was edited by Eduard Fiedler, coordinator of the Triertium research group.

The book launch is a joint initiative of **New Trinitarian Ontologies** and **Triertium**.
